

Great pleasure about the **German Innovation Award 2019**: dynamic E flow is winner in the category "E-Mobility Technologies"

Kaufbeuren, 5.6.2019 - Last week (28.5.) the German Museum of Technology in Berlin was the venue for the festive presentation of the German Innovation Award 2019. dynamic E flow, a Bavarian company, was delighted to have won the German Innovation Award 2019 / Excellence in Business to Business in the category "E-Mobility Technologies". The award went to the innovative electric motor systems with integrated capcooltech®.

CEO & co-founder Michael Anton Naderer and shareholder Georg Zundel accepted the German Innovation Award in Berlin on behalf of the entire DEF team. Press photos for download at <https://www.dynamicEflow.com/presse>

DEF: Start-up with high-tech

Dynamic E flow GmbH (DEF) is a Bavarian start-up and high-tech company with highly innovative know-how and expertise in the field of electric mobility. Based on years of

fundamental research and development work, an innovative technology (capcooltech®) for electrical machines has been developed that can be used extensively.

The applications of capcooltech® are manifold and extend to the fields of industry, mobility, medicine, oil/gas industry and machine types.

By using capcooltech® a new generation of electric machines for 600 V, 450 V and 48 V comes into play. They are characterized above all by compactness, enormous performance, robustness and efficiency. The entire range of electrical machines benefits from these properties and certain applications are only possible through the use of capcooltech®.

DEF develops electrified vehicles with innovative technology as well as special machines, prototypes and small series. At the same time we support our partners in the preparation for the production of larger quantities.

DEF is part of the **Horizon 2020 Research & Innovation Program of the European Union**. In October 2018, DEF received the **eMove360° Award for Electric Mobility & Autonomous Driving** in the Powertrain category. This was followed in May 2019 by the **German Innovation Award 2019** in the category "E-Mobility Technologies".
